

Arizona Department of Transportation
ROADWAY ENGINEERING GROUP

MEMORANDUM

To: All Users of the "Roadway Design Guidelines"

Date: January 2, 2007

From: Mary Viparina *MV*
Assistant State Engineer
Roadway Engineering Group

Subject: 2007 Update
Roadway Design Guidelines
Roadway Engineering Group

The Roadway Engineering Group "Roadway Design Guidelines" (RDG) was previously issued in "Draft" status as each new Chapter was issued. The content has been updated as the new chapters were developed and revisions to previous chapters have been made as needed to correlate with updated material. In addition, we have received feedback from the users and reviewers of design documents using the "Draft" guidelines. The feedback has been very much appreciated and we continue to solicit constructive review comments that may be incorporated into future updates.

The "Draft" status is no longer in effect as of this memorandum. Users should insure that they are using the current text on the website. There are over 60 revisions incorporated into the original draft chapters that were listed in the Current Revisions and Amendments. These will be left available on the website for a short time for those that wish to review. We will start a new listing of Revisions and Amendments with the new 2007 RDG. Users will be notified as before with design memorandums and/or e-mail notifications depending upon the complexity of the revision. The RDG website address is:

<http://www.azdot.gov/Highways/Rdwyeng/RoadwayDesign/ManualsGuidelines/index.asp>

We will continue to update the Appendices and post them on the website with notification as we proceed. The previous Appendices (available from Engineering Records, 602-712-7498) may be utilized until such time they are updated and placed on the website.

Thank you for your attention to the 2007 Guidelines. Please distribute this memo to all design personnel, project managers, consultants, and other users within your Groups and Districts.
